

SUPER SURFER

Adjuvant

**Maximize
the efficiency of
treatments with
enhanced coverage
and nutrient delivery.**

Super Surfer, a nature-based surfactant, optimizes foliar applications, ensuring even coverage and distribution, improved nutrient absorption, and effective pH buffering for healthier, more robust plants.

APPLICATION RATES:

Mix 100ml per 100L of spray solution to ensure uniform application and adherence.

HORTICULTURE & AGRICULTURE

**NURTURING NATURE,
ENHANCING GROWTH**

UKELP

Atlantic Kelp Seaweed

Empower your crops against stress with nature's resilience, fostering robust growth and vitality.

Ukelp harnesses the nourishing power of cold-pressed Ecklonia maxima kelp, delivering a rich blend of amino acids, polysaccharides, betaines, and sterols to stimulate growth and stress tolerance in crops.

APPLICATION RATES:

Apply 1 to 5L per Ha as a foliar spray or soil drench every 4-6 weeks for optimal results. Crop specific application descriptions on label

CHAMPION

Soil conditioner

Elevate crop health with our bioactive protein shake, ensuring vibrant growth, colour and yield.

Champion serves as a potent nutrient cocktail, combining 55% protein hydrolysate with 21% fulvic acid, 21% Ukelp, and 3% flavonoids and citric acid, to deliver a comprehensive nutrient boost for enhanced growth, colour, and health.

APPLICATION RATES:

For vigorous growth, apply 10L per Ha monthly through foliar application or soil incorporation.

GLADIATOR

Mono-silicic acid with boron and calcium

Strengthen your crops from within, enhancing structural integrity and disease resistance.

Gladiator, with its unique blend of monosilicic acid, Boron, and Calcium, fortifies plant cell walls and vascular system and improves nutrient uptake, offering unparalleled resilience against environmental stress and diseases.

APPLICATION RATES:

500ml per Ha in a foliar spray monthly will bolster crop resilience and structural health. Crop specific application descriptions on label.
