PROTEIN HYDROLYSATE

Protein Hydrolysate brings high-quality nitrogen, an integral part of plant proteins and amino acids, into the soil environment. It enhances plant development and metabolic processes while fostering a thriving microbial ecosystem within the soil. This dynamic interplay supports the robust growth of turf and crops, aligning with sustainable agronomic practices.

UKELP ECKLONIA MAXIMA SEAWEED

Ukelp Ecklonia Maxima Seaweed enriches Abundigro Champion with a wealth of growth hormones, vitamins, minerals, amino acids, and micronutrients. Recognized for its unique biostimulant properties, it catalyzes robust plant growth and vitality, boosting crop yield and contributing to sustainable farming practices.

ESSENTIAL NUTRIENTS

Our exclusive blend incorporates an array of vital nutrients - proteins, vitamins, amino acids, organic acids, polysaccharides, and minerals - for comprehensive plant health. These ingredients work synergistically, bolstering everything from root development and leaf vitality to fruiting, creating a resilient ecosystem within your turf or crops.

FULVIC ACID

Fulvic Acid, a powerful organic chelating agent, amplifies nutrient absorption and uptake, optimizing fertilizer efficiency and promoting plant growth. Its role extends to enhancing soil structure, promoting water retention, and activating soil microbial activity, integral for healthy plant growth.

CITRIC ACID

Citric Acid, a key player in the Krebs Cycle, supports energy production in plants. Its presence helps preserve and acidify the soil, ensuring optimum metabolic functions and contributing to overall plant health, aligning with organic cultivation strategies.

CROP4LIFE (C4L) TECHNOLOGY

Our innovative Crop4Life (C4L) Technology enhances photosynthesis, water-use-efficiency, and plant-soil microbe symbiosis. These improvements translate into increased energy production, optimal hydration, better nutrient acquisition, and stronger disease resistance, leading to healthier, high-yielding plants.

UNIFIED POWER OF INGREDIENTS

Abundigro Champion's strength lies in the harmonic synergy of its ingredients, each enriching the soil, nourishing the plants, and supporting their growth, creating unmatched soil conditioning for champions.

As agronomists, we see Abundigro Champion as more than a product - it's a comprehensive, organic-compliant strategy that encompasses vital elements for optimal plant growth, health, and yield. It facilitates simplified routines, reduces reliance on conventional fertilizers, and enhances plant resilience to stressors.

Embark on a journey towards championship growth with Abundigro Champion, where science meets excellence within the parameters of organic farming. Abundigro Champion - your sustainable path to championship-level growth.

SOIL CONDITIONER FOR CHAMPIONS

Abundigro Champion contains 100's of beneficial compounds for the promotion of plant and turf growth, health and stimulation of nutrient uptake.

INCLUDING:
Proteins, amino acids, antioxidants, plant growth hormones, complex carbohydrates, calcium, magnesium, zinc, and A, C, E, B-vitamins.

SHAKE WELL BEFORE USE
Very Important!
To agitate, shake well before use
Store at room temperature
Keep out of direct sunlight
Keep container closed when not in use
Triple rinse once decanted

Product approved for use in organic farming according to EEC889

UN NO.: NOT REGULATED
SEE CONTAINER FOR BATCH DETAILS
COUNTRY OF ORIGIN: REPUBLIC OF SOUTH AFRICA

Approved for use in organic systems in accordance with EC regulation 834/2007 and 889/2008 by Organic Farmers & Growers.
